

5<sup>th</sup> Kazakhstan International Industrial Exhibition “Machine Building, Machine-Tool Building and Automation”

3<sup>rd</sup> Kazakhstan International Exhibition “Non-Destructive Testing and Technical Diagnostics”

Astana, Kazakhstan

**2017 Exhibition Report**

## MachExpo Kazakhstan 2017

## NDT Kazakhstan 2017

Dates: April 26-27<sup>th</sup>, 2017  
Venue: Kazakhstan, Astana, “Korme”  
Exhibition Center  
Frequency: Annually

**A session in Astana was dedicated to the discussion of the domestic machine building market and a number of issues related to the technical diagnostics of the industrial objects**

**Kazakhstan, Astana, April 26-27<sup>th</sup>, 2017** – “Korme” Exhibition Center hosted two industrial exhibitions: Machine-Building, Machine-Tool Building and Automation Exhibition **MachExpo Kazakhstan 2017** and Non-Destructive Testing and Technical Diagnostics Exhibition **NDT Kazakhstan 2017**.

Both events were organized by Iteca LLP, a leading Kazakhstan-based exhibition company, with the support of the Ministry for Investments and Development of the Republic of Kazakhstan and Union of Machine Builders of Kazakhstan. The co-organizer of the NDT Kazakhstan 2017 Exhibition and Conference was the association of legal entities SRO Kazakhstan Register.

Machine building provides stability of all operations of the agricultural complex as well as energy and metallurgical sectors, transportation and other key industries of the national economy. In this light, holding of **MachExpo Kazakhstan 2017** becomes especially actual. This event unites all categories of the machine building segment: labor-intensive, metal-consuming and knowledge-based, and is of the particular interest for the professionals engaged in the mining, metallurgical, oil-and-gas, energy, transportation, agricultural, defense, machine-building and related industries.

An important ingredient in the successful performance of the industrial sector resides in the timely diagnostics of the manufacturing facilities and other separate components. Thus, it was decided to organize the 3<sup>rd</sup> Kazakhstan International Exhibition “Non-Destructive Testing and Technical Diagnostics” **NDT Kazakhstan 2017** along with MachExpo Kazakhstan. This Exhibition demonstrates a full range of the various equipment, devices and services in the field of the non-destructive testing, technical diagnostics, laboratory control, measurements and tests: from visual and radiographic control to the complex monitoring and scanning of objects by the emission from the satellite orbit.

# Visitors:

## Geography of the visitors

## Importance of visiting the exhibition

## Decision-making level

- I have to agree my decisions with other responsible persons in our company
- I make decisions on my own discretion
- I do no influence a decision-making process
- I personally do not make decisions but I give recommendations

## Overall level of satisfaction with the exhibition

- Quite satisfied
- Absolutely satisfied
- Satisfied to some extent
- Not really satisfied
- Absolutely unsatisfied

## Procurement planning

- Yes, for our own needs
- No
- Yes, for the subsequent sale

## Plans to visit the exhibition in 2018

- I will definitely visit
- I will probably visit
- Maybe/I am not sure
- I will not visit
- Probably I will not visit

## Business program and participants:

On April 26<sup>th</sup>, in an effort to unite all key directions of the industrial development, under the auspices of the Exhibition of NDT Kazakhstan 2017, representatives of the Ministry for Investments and Development of the Republic of Kazakhstan gave start to the Conference “Current condition and development trends of the technical diagnostics of the oil-and-gas facilities in the Republic of Kazakhstan”. The agenda of the Conference covered numerous issues of the regulatory approval system of the Republic of Kazakhstan and its statutory instruments for the introduction of new technologies in the field of the occupational safety. Another actual topic of the discussion was related to the system of control over the technical condition of the equipment and facilities of petroleum processing plants.

\*\*\*

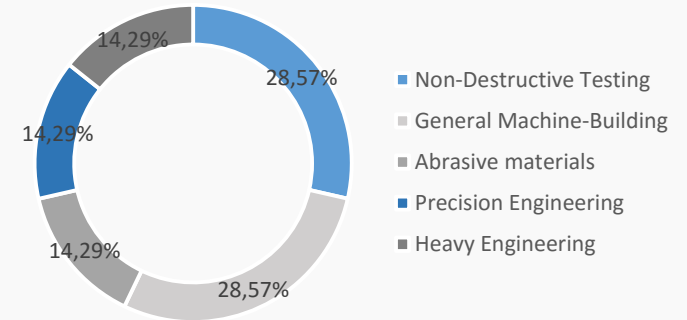

These two exhibitions, MachExpo Kazakhstan 2017 and NDT Kazakhstan 2017, were attended by many leading specialized companies from Bashkortostan, Kazakhstan, Russia, Poland and Czech Republic: OOO GEO -NDT, Konecranes, Metrotest, KLINGSPOR Schleifsysteme GmbH & Co. KG, STARMANS Electronics, s.r.o. and others.

# Participant survey:

### Importance of participating

### Specialty of your company

### Overall level of the satisfaction with the exhibition

### Plans to visit in 2018
